Este objeto define los parámetros de cada indicador en `source`, `target` o `level`.

Parámetro	Tipo	Descripción
`name`	`IndicatorType`	Nombre del indicador del catálogo superior.
`period`	`number`	Periodo principal (ej: 20 para SMA).
`period2`	`number`	Periodo secundario (ej: Slow en MACD o K en Estocástico).
`period3`	`number`	Tercer periodo (ej: Señal en MACD o D en Estocástico).
`stdDev`	`number`	Desviación estándar (ej: 2.0 para Bollinger).
`offset`	`number`	**Bars Back**: 0 = vela actual, 1 = vela anterior, etc.
`multiplier`	`number`	Multiplicador para ATR o

Parámetro	Tipo	Descripción
		canales.
`time_hour`	`number`	Hora (0-23) para condiciones horarias.
`time_minute`	`number`	Minuto (0-59) para condiciones horarias.
`time_condition`	`BEFORE` / `AFTER`	Condición temporal.
`days_lookback`	`number`	Días atrás para Max/Min of X days.
`calc_on_heikin`	`boolean`	Indica si el cálculo se hace sobre data Heikin-Ashi.
